Tolerance on Length	Up to 5/8"										± 0.03		
	Over 5/8 to 1.5"										± 0.05		
	Over 1.5 to 2.75"										± 0.06		
	Over 2.75 to 5"										± 0.09		

Description	An externally threaded fastener with a dome-shaped head and an integrally formed washer; a recess that can accommodate a Six-lobe screwdriver; and a single lead thread. The shank has a reduced diameter and a chip cavity cut out of the final several threads, ending at the tip.
Applications / Advantages	The deeper thread design offers greater resistance to pull-out forces. The round washer head is preferable in softer woods and offers a greater bearing surface than a countersunk design. The chip cavity (or auger point) enables the fastener to drive—especially in denser woods—without pre-drilling a pilot hole.
Material	C1018 - C1022 case-hardened steel
Surface Hardness	550 HV minimum
Case Depth	0.004" - 0.009"
Torque	#8: 35 Kg-cm minimum; #10: 45 kg/cm minimum
Plating	See Appendix-A for plating information
